DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 18-24, drawn to method and apparatus for transmitting signal over a channel, classified in class 375, subclass 295.
 - II. Claims 10-17, drawn to particular receiving apparatus for receiving signal over a channel, classified in class 375, subclass 316.
 - III. Claims 25-32, drawn to method for communication over plural channels, classified in class 375, subclass 260.
 - IV. Claims 33-35, drawn to testing, classified in class 324, subclass 74.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I or II has separate utility such as each of them can independently utilized and there's burden on the examiner to provide two separate references for each group 1 and II. See MPEP § 806.05(d).
3. Inventions I and III or I and IV or III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I or II and III, IV are distinct and different.
